## **PLANNING, DEVELOPMENT AND INFRASTRUCTURE ACT 2016**

### **SECTION 130 – ESSENTIAL INFRASTRUCTURE**

#### **NOTICE OF APPLICATION FOR APPROVAL TO DEVELOPMENT**

Notice is hereby given that an application has been made by **ElectraNet Pty Ltd** (being for the purposes of essential infrastructure) for approval to undertake the expansion of the existing ElectraNet Emeroo Substation.  
**Development Number: 26008387**

The proposed development involves the expansion of the existing substation to allow for the installation of new electricity infrastructure within the substation.

The subject land is located at Maybank Road, Emeroo (with public road access achieved via the Warnertown Road); being Allotment 99, FP163829: CT Volume 6317 Folio 71. The existing substation is sited adjacent to the Bungala Solar Farm which is located approximately 10 kilometres to the north-east of Port Augusta.

The development site is located within the Remote Areas Zone of the Planning and Design Code (Version 2026.8 dated 30 April 2026).

A copy of the development application is available for download from the PlanSA website at [https://plan.sa.gov.au/en/state\\_developments](https://plan.sa.gov.au/en/state_developments) and can also be viewed in person at Planning and Building, Department for Housing and Urban Development, Level 9, 83 Pirie Street, Adelaide. Please call 1800 752 664 (PlanSA Help desk) beforehand to confirm access and visitation arrangements.

Any person or body who desires to do so may make representations concerning the application by notice in writing, either by using the online submission form on the PlanSA website, via post to the Senior Governance Officer, State Commission Assessment Panel, GPO Box 1815, Adelaide SA 5001, or via email to [spreps@sa.gov.au](mailto:spreps@sa.gov.au)

All written submissions must be received **NOT LATER THAN 19 June 2026**.

Each person or body making a representation should state the reason for the representation and whether that person or body wishes to be given the opportunity to appear before the SCAP to further explain the representation. Submissions may be included in SCAP agenda documents.

Should you wish to discuss the application, and the public notification procedure please contact Simon Neldner on (08) 7133 2376 or [simon.neldner@sa.gov.au](mailto:simon.neldner@sa.gov.au)

State Commission Assessment Panel  
GPO Box 1815  
Adelaide SA 5001  
Submitted via Planning Portal

Dear Team Leader, Essential Infrastructure

### **Expansion of the Emeroo Substation - S130 Electricity Infrastructure Development Application**

AECOM Australia Pty Ltd (AECOM) is submitting this Development Application on behalf of ElectraNet Pty Ltd (ElectraNet) to expand the existing ElectraNet Emeroo Substation. The proposed development is required to accommodate the Emeroo Battery Energy Storage System (BESS).

The proposed development constitutes essential infrastructure for the purposes of Section 130(1) of the *Planning, Development, and Infrastructure Act, 2016* (PDI Act), having regard to the requirements of Regulation 104A(1) of the *Planning, Development, and Infrastructure (General) Regulations 2017* (PDI Regulations). Therefore, a Development Application is required under Section 130 – Essential Infrastructure of the PDI Act.

Please accept this letter and the attached documentation as a formal application in accordance with Section 130(3) of the PDI Act and Regulation 104A(3) of the PDI Regulations.

#### **1.0 Project Background**

The existing ElectraNet Emeroo Substation is sited adjacent to the Bungala Solar Farm which is located approximately 10 kilometres to the north-east of Port Augusta.

The Emeroo BESS (225MW/900MWh) is proposed to be constructed within the boundary of the Bungala Solar Farm and includes a direct connection into the ElectraNet Emeroo Substation.

Potentia Energy lodged an application for an Associated Infrastructure Licence for the Emeroo BESS (AILA 4) under the *Hydrogen Renewable Energy Act 2023* (HRE Act). The Statement of Environmental Objectives for the Project was approved as per the Government Gazette issued on 7 August 2025. The Emeroo BESS is the first project to progress to this stage under the new HRE Act process and Potentia Energy are currently in the process of finalising the licence agreement with the Department for Energy and Mining and the preconstruction requirements under the HRE Act.

As the Substation is an ElectraNet asset, the proposed substation works are not captured by the HRE Act licence and require approval under the PDI Act.

#### **2.0 Project Site and Locality**

The Project site is contained within the following parcel of land:

- Allotment 99 in Filed Plan 163829, contained within the Certificate of Title Volume 6317 Folio 71

A copy of the Certificate of Title is provided in Attachment A.

Allotment 99 is located outside of a Council area (within the Pastoral Unincorporated Area); however, the northern boundary of the Port Augusta City Council adjoins the southern allotment boundary.

The Project site comprises the ElectraNet Emeroo Substation and a portion of the vacant land surrounding the Substation to the south and west. This surrounding land contains low-lying native vegetation.

The Project site is bordered by the Bungala Solar Farm to the north and west, and a Council-owned road reserve to the south. This road reserve provides access to the existing substation and solar farm from Warrakimbo Road.

The Emeroo BESS is proposed to be located south of the Emeroo Substation, on the southern side of the Council road that bisects the Bungala Solar Farm.

## Locality

The locality generally comprises of solar panels associated with the Bungala Solar Farm to the north, west and south. The land to the east is extensively covered in native vegetation.

Outside of the solar farm, development is limited within the locality with only three dwellings located within a seven (7) kilometres radius of the substation site. The nearest dwelling (being the Emeroo Homestead) is located approximately 1.5 kilometres to the east of the substation site.

Other key features within the extended locality include:

- Warrakimbo Road – approximately 150 metres to the east
- The disused Copley rail line – approximately 180 metres to the east
- The State heritage listed Ostrich Farm Ruins “Emeroo Station” – approximately 3 kilometres to the south-west
- Port Augusta – approximately 10 kilometres to the south-west

The Project site and locality are further illustrated in Figure 1 below.

**Figure 1** Locality

### 3.0 Proposed Development

The proposed development involves the expansion of the existing ElectraNet Emeroo Substation to allow for the installation of new electricity infrastructure within the substation. The proposed works are required to accommodate the additional load resulting from the soon-to-be-constructed Emeroo BESS which is proposed to be connected to the substation via an underground cable.

The proposed development is illustrated in the attached plans (Appendix B) and described in further detail below.

#### **ElectraNet Emeroo Substation expansion and internal works**

The proposed development involves the expansion of the existing substation by approximately 930 square metres. The fenced substation boundary will be extended to the west by 12.8 meters and to the south by 6.3 meters to accommodate the proposed substation infrastructure and internal access road.

The expansion works include the installation of a new transformer, control building, associated connections and fencing which are essential to accommodate the Emeroo BESS and allow for safe and continuous operation of the existing Substation. The proposed internal infrastructure will be consistent in form and scale with that contained within the existing substation.

The extension of the substation requires the relocation of an existing drainage swale that currently runs parallel to the southern and western boundaries of the substation.

A secondary access to the substation is proposed which will provide a connection between the proposed substation expansion and the Council-owned central access road.

#### **Installation of an underground transmission cable**

To connect the BESS to the substation, a new underground cable is required to run between the BESS and the ElectraNet Emeroo Substation.

The construction of an underground cable is 'not development' for the purposes of the PDI Act, having regard to Schedule 4A of the PDI Regulations, and does not require consideration within this development application.

However, as the cable is proposed to pass beneath a Council-owned road, an easement will be required to be granted prior to the construction of the cable. This process will occur outside of this Development Application.

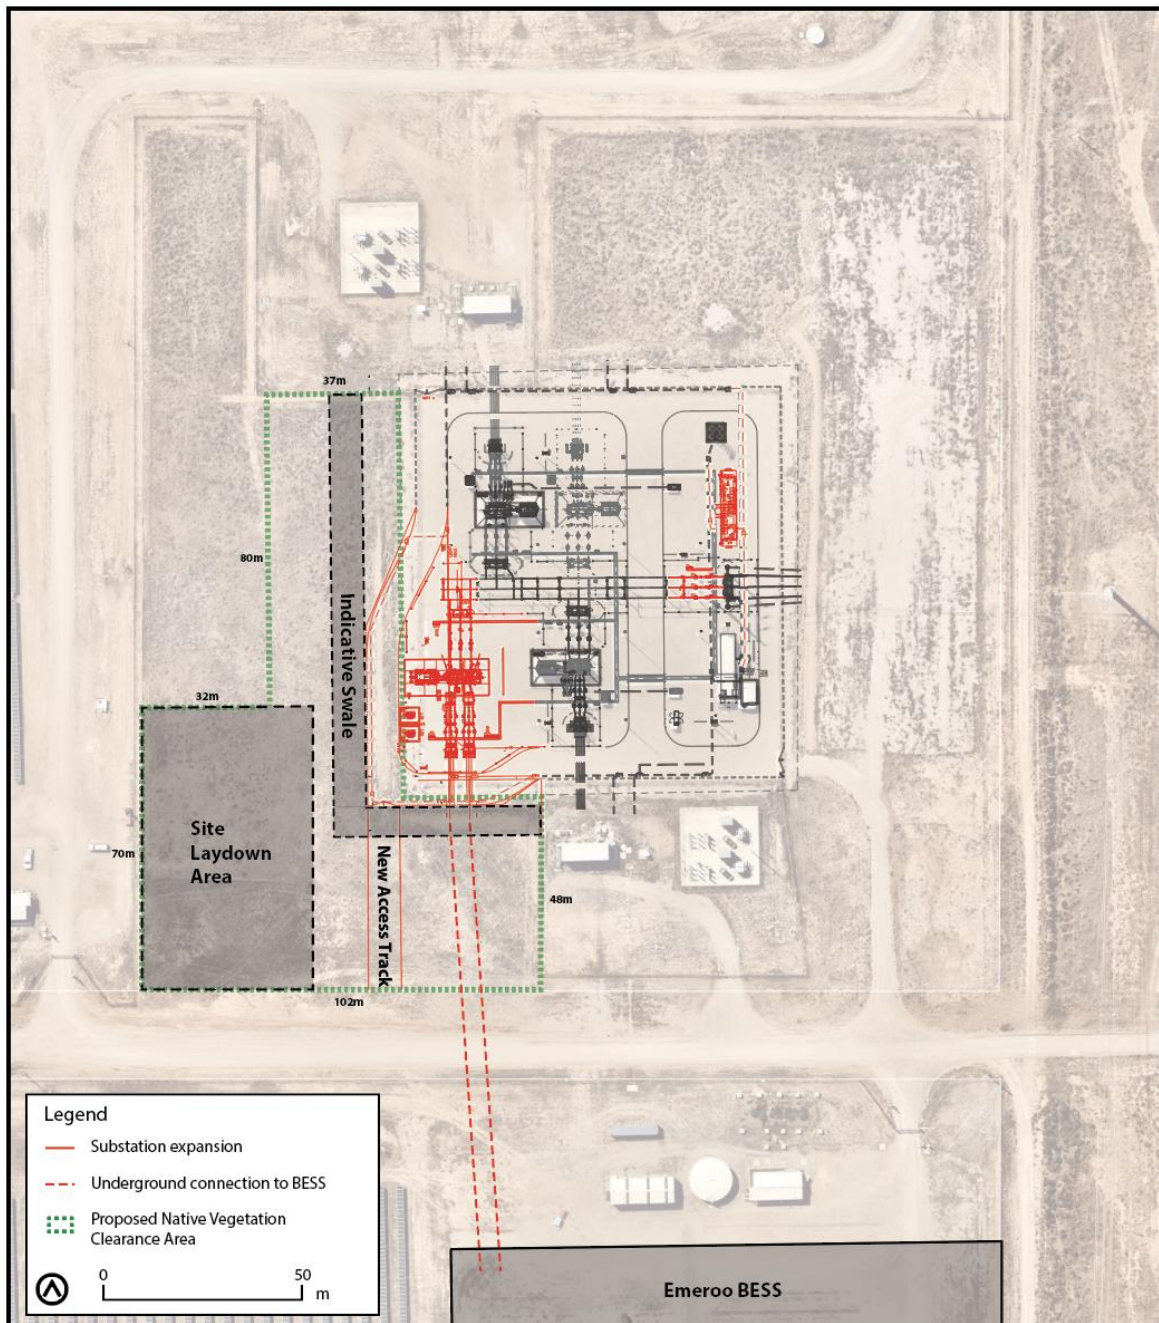

#### **Native vegetation clearance**

Native vegetation is scattered across the vacant area where substation expansion is proposed. Clearance of vegetation is required to facilitate the substation expansion, new swale, access track and construction laydown area. The proposed native vegetation clearance area is shown in Figure 2.

With regard to the laydown area, it is noted that this is required on the southwest of the substation/expansion works for construction purposes. Utilising the previously cleared laydown area to the east is not viable, as it would require moving equipment through/around the existing substation during construction.

Further details of the required native vegetation clearance are provided in the Native Vegetation Clearance Data Report, prepared by Ecosphere Ecological Solutions (Attachment C).

**Figure 2 ElectraNet Emeroo Substation Expansion Proposal Plan**

## 4.0 Procedural Matters

For the purpose of Regulation 31(1)(a), (b) and (c) of the PDI Regulations, details outlining the nature and category of development and the relevant authority are provided below.

Verification Matter	Comment
Nature of Development	Alterations and expansion of the existing ElectraNet Emeroo Substation in association with the Emeroo BESS project
Elements	The proposed works fall within the definition of an 'Electricity Substation' pursuant to Part 7 – Land Use Definitions of the Code.
Category	Essential Infrastructure – Section 130
Relevant Authority	Minister for Planning

## 4.1 Referrals

The application does not fall within the area of a Council. Therefore, no Council referral is required pursuant to Section to 130(5) of the PDI Act.

Also, no agency referrals are required for this development application pursuant to Schedule 9 of the PDI Regulations. Further justification is provided below.

### Heritage

The State Heritage Place and Heritage Adjacency Overlays apply to the subject land as the footprint of the State Heritage listed Former Ostrich Farm, Emeroo Station (State Heritage ID: 12702), extends through the centre of the Bungala Solar Farm (principally along the road reserve) and to the south of the existing substation (refer to Figure 3). The heritage values of the listing include the Original Homestead, Ruins of Hatching Shed, Exotic Plants and Ostrich Fences. The portion of the footprint adjacent to the substation relates to the historical location of the Ostrich Fences. No fence elements remain adjacent to the site.

A referral to the Minister responsible for the administration of the *Heritage Places Act 1993* pursuant to Schedule 9(17) of the PDI Regulations is not warranted as the proposed development is considered to be minor in nature given it will result in no material impact on the State Heritage Place, due to the following:

- The proposed development comprises of an expansion to an existing substation which is positioned adjacent a large-scale solar farm
- The development is well separated from any remaining heritage features of the listed item.

### Native Vegetation

A Native Vegetation Clearance Data Report has been prepared by Ecosphere Ecological Solutions who is an Accredited Consultant under the *Native Vegetation Act 1991* (Native Vegetation Act). The report identifies that clearance of native vegetation will be required to facilitate the proposed development.

The report determines that the proposed native vegetation clearance is Level 2. As the development is within a Native Vegetation Overlay, and the clearance level is not Level 3 or Level 4, the development application is not subject to referral to the Native Vegetation Council pursuant to Schedule 9(11) of the PDI Regulations.

## 4.2 Public Notification

The cost of the development is more than \$10 million (\$25 million) and as such, the application requires public notification under Section 130(12) of the PDI Act.

Figure 3 State Heritage listed Former Ostrich Farm, Emeroo Station – Footprint

## 5.0 Development Controls

The Project site is located within the Remote Areas Zone of the Planning and Design Code (the Code) and is subject to the following planning overlays:

- Hazards (Bushfire - Outback)
- Heritage Adjacency
- Hazards (Flooding - Evidence Required)
- Key Outback and Rural Routes
- Native Vegetation
- State Heritage Place
- Water Resources

## 6.0 Development Assessment

The following assessment is provided in relation to the proposed development against the relevant policies of the Code.

The applicable policies include Desired Outcomes (DO's) and Performance Outcomes (PO's).

### 6.1 Remote Areas Zone

The following policies of the Remote Areas Zone are relevant to the assessment of this application:

Remote Areas Zone	
DO 1	A zone that includes a diverse range of uses including pasture growing, grazing, farming, agricultural processing and transportation, mining and petroleum, energy generation and storage, pipeline infrastructure, aerospace and defence-related facilities, Aboriginal lands and related activities, tourist development, workers' accommodation and settlements.

Whilst not explicitly envisaged within the Remote Areas Zone, the proposed development is a type of development that exists within the Zone and represents an expansion of critical infrastructure required to support an approved energy storage project.

### 6.2 Overlays

The proposed development has been considered against all overlays that affect the Project Site, and only the State Heritage Overlay, Heritage Adjacency Overlay and the Native Vegetation Overlay are deemed relevant to this essential infrastructure project.

#### 6.2.1 State Heritage and Heritage Adjacency Overlays

The following policies of the Heritage Adjacency Overlay are considered most relevant to the assessment of the application:

State Heritage Overlay	
DO 1	Development maintains the heritage and cultural values of State Heritage Places through conservation, ongoing use and adaptive reuse consistent with Statements of Significance and other relevant documents prepared and published by the administrative unit of the Public Service that is responsible for assisting a Minister in the administration of the <i>Heritage Places Act 1993</i> .
PO 1.1	The form of new buildings and structures maintains the heritage values of the State Heritage Place.

Heritage Adjacency Overlay	
DO 1	Development adjacent to State and Local Heritage Places maintains the heritage and cultural values of those Places.

## State Heritage Overlay

PO 1.1	Development adjacent to a State or Local Heritage Place does not dominate, encroach on or unduly impact on the setting of the Place.
--------	--

As outline in Section 4.1, the footprint of the State Heritage listed Former Ostrich Farm, Emeroo Station, extends to the south of the existing substation. However, given the type and scale of development that exists on and surrounding the Project site and the separation of the proposed development from any remaining heritage features, the Project will not result in any materially impact on this listed item.

### 6.2.2 Native Vegetation Overlay

The following policies of the Native Vegetation Overlay are considered most relevant to the assessment of the application:

#### Native Vegetation Overlay

DO 1	Areas of native vegetation are protected, retained and restored in order to sustain biodiversity, threatened species and vegetation communities, fauna habitat, ecosystem services, carbon storage and amenity values.
PO 1.1	Development avoids, or where it cannot be practically avoided, minimises the clearance of native vegetation taking into account the siting of buildings, access points, bushfire protection measures and building maintenance.
PO 1.2	Native vegetation clearance in association with development avoids the following: <ul style="list-style-type: none"> <li>a) significant wildlife habitat and movement corridors</li> <li>b) rare, vulnerable or endangered plants species</li> <li>c) native vegetation that is significant because it is located in an area which has been extensively cleared</li> <li>d) native vegetation that is growing in, or in association with, a wetland environment.</li> </ul>

As outlined in section 3.0, native vegetation is required to be cleared in association with the development.

The proposed development has sought to minimise impact on the native vegetation in accordance with PO 1.1 and PO 1.2. The clearance footprint has been refined to impact the areas of lowest vegetation condition and is surrounded by areas of existing disturbance which limits further fragmentation.

In addition, the affected vegetation was captured within the area approved for clearance as part of the original solar farm development and has been previously disturbed.

An approval under the *Native Vegetation Act 1991* will be required for the clearance of native vegetation required to carry out the proposed development.

### 6.3 General Development Policies

The following General Infrastructure and Renewable Energy policies are relevant to the assessment of this development application:

#### Infrastructure and Renewable Energy Facilities

DO 1	Efficient provision of infrastructure networks and services, renewable energy facilities and ancillary development in a manner that minimises hazard, is environmentally and culturally sensitive and manages adverse visual impacts on natural and rural landscapes and residential amenity.
PO 1.1	Development is located and designed to minimise hazard or nuisance to adjacent development and land uses.

## Infrastructure and Renewable Energy Facilities

PO 4.2	Facilities for energy generation, power storage and transmission are separated as far as practicable from dwellings, tourist accommodation and frequently visited public places (such as viewing platforms / lookouts) to reduce risks to public safety from fire or equipment malfunction.
PO 5.1	Electricity infrastructure is located to minimise visual impacts through techniques including: <ol style="list-style-type: none"> <li>1. siting utilities and services:                 <ol style="list-style-type: none"> <li>1. on areas already cleared of native vegetation</li> <li>2. where there is minimal interference or disturbance to existing native vegetation or biodiversity</li> </ol> </li> <li>2. grouping utility buildings and structures with non-residential development, where practicable.</li> </ol>

The efficient provision of infrastructure in a manner that minimises hazard and manages visual impacts is sought by the abovementioned Infrastructure and Renewable Energy Facilities policies.

The proposed development comprises works to essential infrastructure which are required to accommodate the Emeroo BESS and will result in minimal hazard and visual impacts to adjoining properties, given that:

- The proposed infrastructure is located away from dwellings and other sensitive land uses
- The proposed develop will require the relatively minor expansion of the existing ElectraNet Substation and will be consistent in form and scale with the existing substation infrastructure
- The proposed development supports the Emeroo BESS project, which will increase capacity and improve reliability for the South Australian electricity network and customers

Having regard to the above, the proposed development is consistent with the intent of the relevant Desired and Performance Outcomes applicable to the Remote Areas Zone, relevant Overlays and General Development Policies.

### 7.0 Conclusion

The proposed electricity infrastructure is required to support electricity services throughout the region and facilitate the connection of the approved Emeroo BESS.

The proposed development has been designed and sited to utilise the existing substation site and will result in minimal environmental and visual impacts.

On balance, the proposed development accords with the relevant provisions of the Code and warrants approval.

We look forward to your consideration of this application. Should you wish to discuss this application further, please do not hesitate to contact me on the details below.

Yours faithfully

**Mitigation hierarchy**

The work is essential for the safe and continuous operation of the Emeroo Substation under increased baseload power storage associated with the soon to be constructed Emeroo Battery Energy Storage System. The footprint of the substation will be expanded to accommodate increased numbers and size of transformers and associated infrastructure.

**SEB Offset proposal**

Payment of \$11,756.32 into the Native Vegetation Fund.

# 2 Purpose of Clearance

## 2.1 Description

Ecosphere Ecological Solutions (Ecosphere) was engaged by AECOM on behalf of Potentia Energy to undertake a risk assessment for works associated with the Emeroo Substation (Figure 1). The substation is required to be extended to accommodate increased storage and baseload power associated with the soon to be constructed Emeroo Battery Energy Storage System (BESS) within the existing Bungala Solar Farm.

The area surrounding the existing substation (i.e., the Project area) was assessed during an on-ground survey on the 28<sup>th</sup> of October 2025. The Project area was inspected to determine the existing state of native vegetation present, identify whether any areas of significant flora or fauna habitat exist within the Project area, and whether the substation expansion is able to further refine design phases to avoid or minimise impacts associated with clearance of vegetation during construction and ongoing operation.

Following the initial assessment, the footprint was refined down to the current extent covering an area of 0.94 hectares (Figure 2).

## 2.2 Background

### 2.2.1 Interim Biogeographic Regionalisation for Australia (IBRA)

The Project area is located in the Flinders Lofty Block Bioregion as described by the Interim Biogeographic Regionalisation for Australia (IBRA). Due to the diverse landscapes and habitats found within each Bioregion, Subregions are further used for the purpose of describing biodiversity issues. The Project area thus falls within the Southern Flinders Subregion which has 75 % native vegetation cover remaining, of which 5 % is formally protected.

### 2.2.2 National Vegetation Information System (NVIS)

The National Vegetation Information System (NVIS) is a comprehensive data system that provides information on the extent and distribution of vegetation types in Australian landscapes.

One native vegetation association was mapped within the Project area as recorded by the Native Vegetation Floristic Areas - NVIS – Statewide dataset (NatureMaps 2025):

- *Atriplex vesicaria* ssp., +/- *Maireana sedifolia*, +/- *Maireana pentatropis* low shrubland over *Sclerolaena diacantha*, *Austrostipa nitida*, *Sclerolaena obliquicuspis*, *Tetragonia eremaea*, *Brassica tournefortii*, *Stenopetalum lineare*, *Senecio pinnatifolius*

## 2.3 General Location

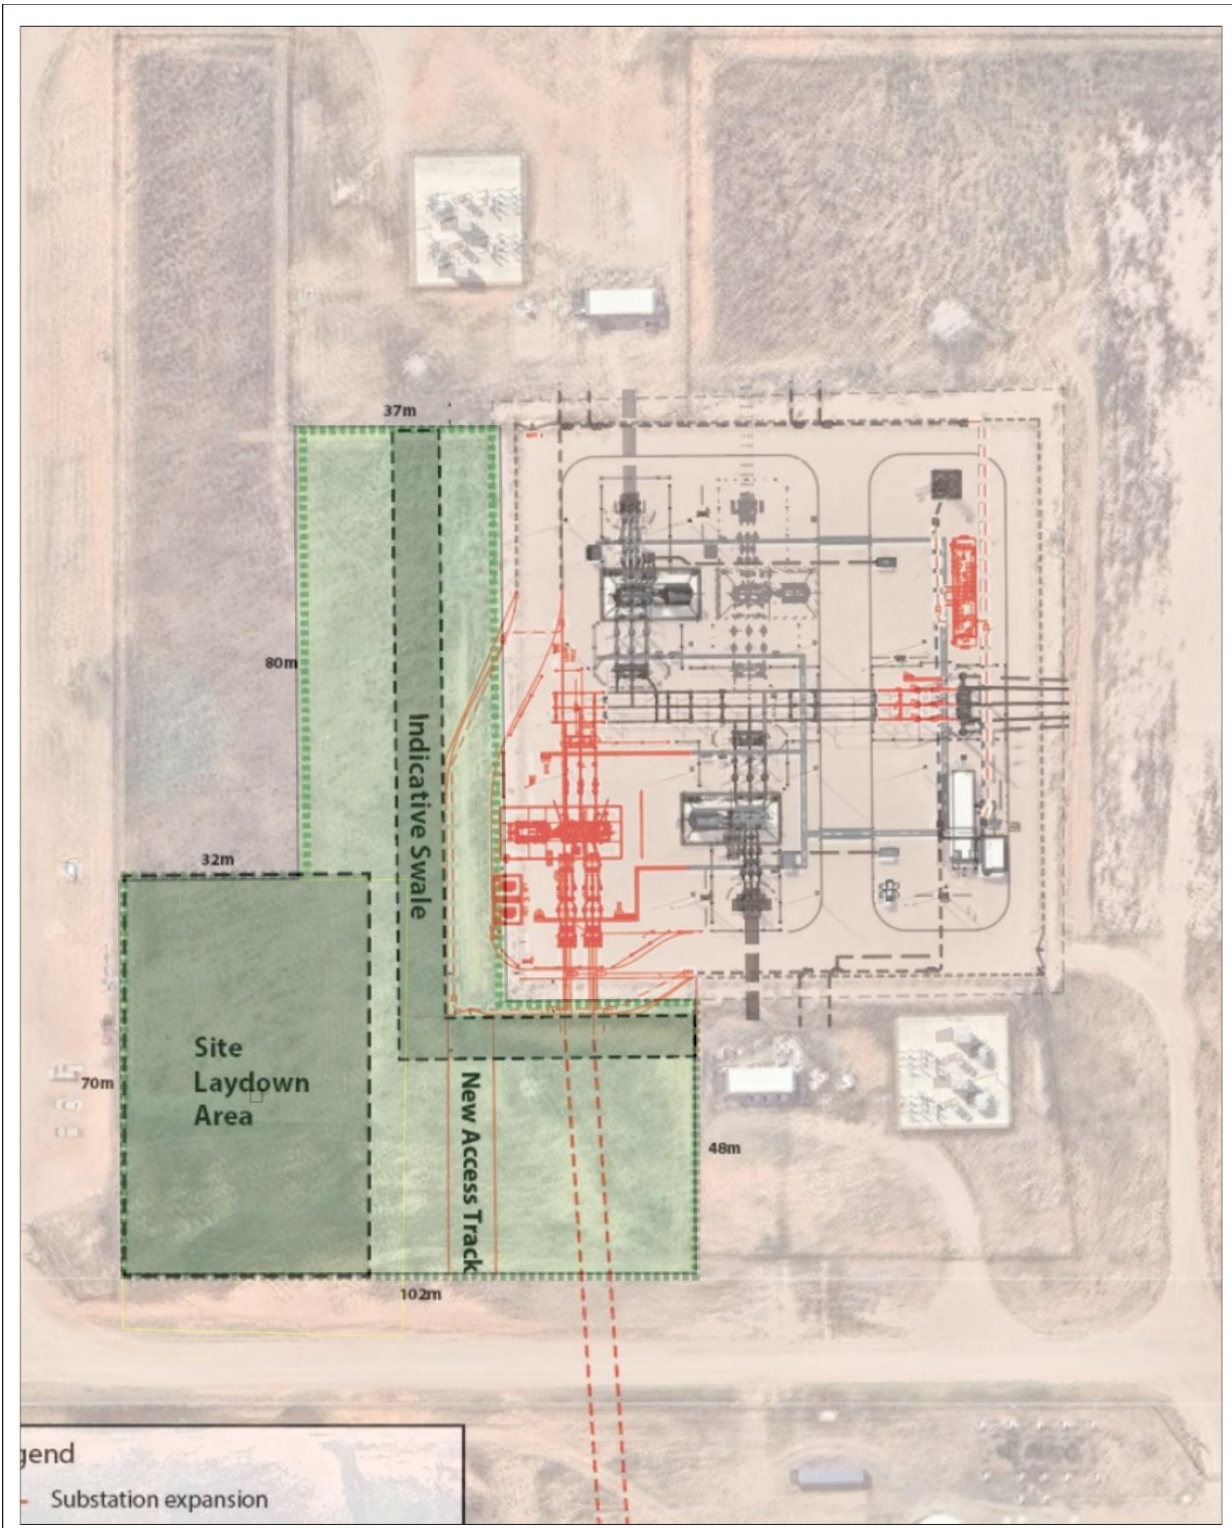

Figure 1. Location of the Emeroo expansion area with existing Bungala Solar Farm

 Data Sources: DEW, Google

Figure 2. Refined footprint utilising areas of lowest condition and smallest extent.

# 3 Details of the Proposal

The Emeroo Substation is required to be extended to accommodate increased storage and baseload power associated with the soon to be constructed Emeroo BESS within the existing Bugala Solar Farm. This work is essential for safe and continuous operation under increased baseload power storage. The footprint of the substation will be expanded to accommodate increased numbers and size of transformers and associated infrastructure.

The development comprises an expansion of the existing substation, including:

- Additional electricity infrastructure
- Associated expansion of the substation boundary / fencing and realignment of swale to the south and west
- Underground cable connection to the Emeroo BESS
- New vehicle access
- Site laydown area – note the laydown is required on the south west of the substation/expansion works for construction purposes. Utilising the previously cleared laydown area to the east is not viable, as it would require moving equipment through/around the existing substation during construction.

## 3.1 Approvals Required or Obtained

Provide details of the following approvals or applications under the follow legislation where relevant:

- *Native Vegetation Act 1991* (NV Act) (Clearance approval is subject of the current proposal)
- *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) (Desktop assessment undertaken to determine if Matters of National Environmental Significance (MNES) occur within the Project area, detailed below)
- *National Parks and Wildlife Act 1972* (NP&W Act) (Desktop assessment undertaken to determine if state level threatened flora and fauna occur within the Project area, detailed below)

## 3.2 Native Vegetation Regulation

The Native Vegetation Regulation under which the proposed clearance is suggested to be assessed is Regulation 12(34) – Infrastructure.

To allow clearance of vegetation incidental to the construction or expansion of a building or infrastructure (and associated services) where the Minister has declared that the clearance is in the public interest.

Proponent must comply with the following additional requirements:

- Clearance incidental to the construction or expansion of a building or infrastructure where it is deemed the clearance is in the public interest; and / or
- Clearance is required in connection with the provision of infrastructure or services to a building or place provided that consent under the *Development Act 1993* (now supersede by the *Planning, Development and Infrastructure Act 2016*) has been obtained; and/or
- Clearance is undertaken in accordance with an NVC- approved Standard Operating Procedure.

## 3.3 Development Application Information

Under the PDI Act, Lot 91 Maybank Road Emeroo South Australia 5713 (Title ID: CT/6317/71, Parcel ID: F163829 A99), is zoned as Remote Areas and falls within the following overlays:

- Hazards (Bushfire - Outback)
- Heritage Adjacency
- Hazards (Flooding - Evidence Required)

- 
- Key Outback and Rural Routes
  - Native Vegetation
  - State Heritage Place
  - Water Resources

### 3.4 Climate

The Southern Flinders Subregion has a mostly semi-arid to arid climate with hot dry summers and cooler winters. Mean annual rainfall from 1976 – 2005, as accessed via NatureMaps (2024), is 264 mm at the Project area.

# 4 Methods

## 4.1 Desktop Assessment

A desktop assessment was used to search for historical records of threatened communities, threatened flora, and threatened or migratory fauna that are known to, or possibly occur, within 50 km of the Project area.

## 4.2 Protected Matters Search Tool (PMST)

A Protected Matters Search Tool (PMST) report was generated on the 30<sup>th</sup> of October 2025 to identify MNES under the EPBC Act relevant to the Project area (DCCEEW 2025). The PMST is maintained by the Department of Climate Change, Energy the Environment and Water (DCCEEW) and was used to identify flora and fauna or ecological communities and wetlands of national environmental significance that may occur or are likely to have suitable habitat within 50 km of the Project area. Results were further refined by considering only those flora and fauna which the PMST considered as having habitat known to occur within the area of interest as per the Rangeland Assessment Method (RAM) (NVC 2024). The results returned by the PMST are based on a modelled distribution of each community and each flora and fauna species (or subspecies) and thus require additional information to clarify their possible presence in the Project area.

## 4.3 Biological Database of South Australia (BDBSA)

Records for threatened flora and fauna and migratory fauna listed under the EPBC Act or NP&W Act were assessed using the Biological Database of South Australia (BDBSA) Supertable (DEW 2025), accessed via the general query tool on NatureMaps (NatureMaps 2025). The BDBSA is comprised of an integrated collection of corporate databases which meet the Department for Environment and Water (DEW) standards for data quality, integrity, and maintenance. In addition to DEW biological data the BDBSA also includes data from partner organisations (Birdlife Australia, Birds SA, Australasian Wader Study Group, SA Museum, and other State Government Agencies). This data is included under agreement with the partner organisation for ease of distribution, but they remain owners of the data and should be contacted directly for further information. The dataset was obtained on the 30<sup>th</sup> of October 2025 and was used to identify records of conservation significant flora and fauna (i.e., threatened and / or migratory) that have been recorded within 50 km of the Project area, have a spatial reliability of < 1 km, and were recorded during or after 1995, as per the RAM (NVC 2024).

## 4.4 Assessment of the Likelihood of Occurrence

A likelihood of occurrence assessment for conservation significant flora and fauna highlighted by the PMST report and the BDBSA search as occurring within 50 km of the Project area was conducted. This assessment was used to filter the outputs of the PMST report and BDBSA search results to derive a subset of conservation significant flora and fauna with potential to occur in the Project area. The assessment was updated with habitat suitability information obtained during the field survey.

A likelihood of occurrence rating (Highly Likely, Likely, Possible, and Unlikely) was assigned to each of the conservation significant flora and fauna identified in the desktop PMST report and BDBSA search based on the combination of records existing within 50 km of the Project area and knowledge of suitable habitat occurring in the Project area (Table 2). Conservation significant flora and fauna observed during the field survey(s) were given a rating of Known.

Table 3. Criteria for the likelihood of occurrence of conservation significant flora and fauna within the Project area based on BDBSA records<sup>1</sup>.

Likelihood	Criteria
Highly Likely	Recorded in the last 10 years, the species / subspecies does not have highly specific niche requirements, the habitat is largely intact and falls within the known range of the species / subspecies distribution.
Likely	Recorded within the previous 20 years, the area falls within the known distribution of the species / subspecies, and the area provides habitat which is largely intact.
Possible	Recorded within the previous 20 years, the area falls inside the known distribution of the species / subspecies, but the area does not provide habitat which is largely intact. Recorded within 20-40 years, survey effort is considered adequate, habitat is present and intact, and flora or fauna of similar habitat needs have been recorded in the area.
Unlikely	Recorded within 20-40 years; however, suitable habitat does not occur, and flora or fauna of similar habitat requirements have not been recorded in the area. No records within the previous 40 years despite suitable habitat being known to occur in the area. No records despite adequate survey effort.

<sup>1</sup> The final likelihood of occurrence of conservation significant flora and fauna within the Project area was modified based on local knowledge and information obtained during the field survey(s).

#### 4.4.1 Desktop Limitations

The content of the desktop study was derived from existing datasets and references from a range of sources. Flora and fauna records were sourced from the PMST report and the BDBSA search via NatureMaps. The BDBSA only includes verified flora and fauna records submitted to DEW or partner organisations. It is recognised that drawing conclusions can be unreliable within areas that have been underrepresented in terms of biological studies. It is possible, therefore, that conservation significant flora and fauna occur within the Project area that were not reflected by database records. As such, conservation significant flora and fauna highlighted by the PMST report but without BDBSA records within the 50 km buffer of the Project area may still be classified as possible, likely, or highly likely to occur within the Project area based on suitable habitat alone.

#### 4.5 Field Survey

A field survey was undertaken by Ecosphere on the 28<sup>th</sup> of October 2025.

##### 4.5.1 Vegetation Survey

The vegetation survey was performed in accordance with the RAM devised by the NVC (NVC 2024). The RAM has been developed for the purpose of assessing native vegetation systems in the arid zone of SA and focuses on recording woody perennial plants and long-lived perennial grasses that persist in the landscape as well as various biotic (e.g., grazing pressure) and physical disturbance indicators (e.g., prevalence of unproductive bare soil patches) to determine the biodiversity value of an area (i.e., the Unit Biodiversity Score (UBS)). See the Rangelands Assessment Manual (NVC 2024) for detailed methodology of the RAM.

# 5 Assessment Outcomes

## 5.1 Vegetation Assessment

The vegetation surrounding the existing substation and solar development area was dominated by remnant *Maireana pyramidata* (Black Bluebush) shrubland, indicating that the site was likely in a relatively low ecological condition prior to the original solar development. Although the area is currently grazed largely by kangaroos, it lacks a nearby water source and prolonged dry conditions have further reduced vegetation vigour and cover.

At the time of site assessment, plant health and structure were poor, with evidence of widespread dieback in species such as *Sarcozona praecox* (*Sarcozona*). Intact native shrub cover was limited, and overall vegetation diversity and density were low. The only area supporting vegetation in moderate condition was associated with the stormwater retention swales surrounding the substation, where runoff and sediment accumulation from adjacent hardstand surfaces has supported comparatively greater plant establishment.

Several weed species were recorded within the assessment area. The most significant from a legislative perspective was the declared *Opuntia* spp. (Prickly Pears), along with other environmental weed species including widespread *Carrichtera annua* (Ward's Weed) and *Limonium lobatum* (Winged Sea Lavender / Statice).

Table 4 below summarises the vegetation recorded within the expansion area while Figure 3 shows the expansion area under the current refined clearance proposal.

Table 4. Vegetation description summary

Site 1	Low Very Open Chenopod Shrubland consisting of <i>Maireana pyramidata</i> (Black Bluebush) +/- <i>Atriplex vesicaria</i> (Bladder Saltbush) over <i>Sarcosoma praecox</i> (Noon Flower).	
 <p>DIRECTION N (T) 53s 767723 6410078 ACCURACY 28 m DATUM GDA2020</p> <p>Emeroo sub station extension 28/10/2025</p>	 <p>DIRECTION W (T) 53s 767889 6410109 ACCURACY 2 m DATUM GDA2020</p> <p>Emeroo sub station extension 28/10/2025</p>	 <p>DIRECTION SW (T) 53s 767725 6410069 ACCURACY 14 m DATUM GDA2020</p> <p>Emeroo sub station extension 28/10/2025</p>
Wash out area	Sedimentation zone	Stable gibber plain within easement
<p><b>General description</b></p>	<p>The site within the refined footprint consisted of gibber stony plain landform composed of heavy clay soil with sparsely scattered <i>Maireana pyramidata</i> and <i>Atriplex vesicaria</i>. At the time of the survey, no significant ephemeral cover was recorded however was not expected to be significant in this zone with an intact soil crust present. Stone cover was moderate to high and low numbers of weeds were present in the area generally. The site is of low ecological significance and not likely to support species of state or national conservation significance due to the surrounding land use and levels of disturbance at the site under current use. Species listed below may occur as fly throughs or in dispersing through the area however resource availability in the area is very low and while not unlikely, the potential of observing these species at the site other than as limited opportunistic sightings is unlikely and the site does not provide habitat critical to the survival or persistence of any of these species.</p>	
<p><b>Threatened species or community</b></p>	<p>No threatened communities or flora were recorded.</p> <p>The vegetation association potentially provides habitat for the following threatened fauna:</p> <ul style="list-style-type: none"> <li>• <i>Aphelocephala leucopsis leucopsis</i> (Southern Whiteface, EPBC: VU)</li> <li>• <i>Falco subniger</i> (Black Falcon, NPW: R)</li> <li>• <i>Hieraaetus morphnoides</i> (Little Eagle, NPW: V)</li> <li>• <i>Neophema chrysostoma</i>, (Blue-winged Parrot, EPBC: VU, NPW: V)</li> </ul>

## 5.2 Threatened Species Assessment

### 5.2.1 EPBC PMST Report Summary

A total of 62 listed threatened flora and fauna and 43 migratory fauna were identified by the EPBC Act PMST report as potentially occurring or having suitable habitat potentially occurring within 5 km of the Project area (Table 5). However, of these, 33 were considered as known to occur or known to have habitat within the search area as per the PMST report. Fourteen of these were migratory. The ecological MNES protected under the EPBC Act relevant to this report are discussed in detail below.

Table 5. PMST report ecological MNES results summary.

Search area (5km buffer)	Matters of National Environmental Significance	Identified within search area
	World Heritage Properties	0
	National Heritage Places	0
	Wetlands of International Importance (RAMSAR)	0
	Great Barrier Reef Marine Park	0

Geological and Bioregional Assessments	0	

### 5.2.2 Threatened Ecological Communities (TEC)

Ecological communities at risk of extinction may be listed as Threatened Ecological Communities (TEC) under the EPBC Act. Three TEC were identified in the PMST report as occurring or potentially occurring within 50 km of the Project area:

- Peppermint Box (*Eucalyptus odorata*) Grassy Woodland of South Australia (EPBC: CR)
- Grey Box (*Eucalyptus microcarpa*) Grassy Woodlands and Derived Native Grasslands of South-eastern Australia (EPBC: EN)
- Subtropical and Temperate Coastal Saltmarsh (EPBC: VU)

No vegetation matching a TEC description listed under the EPBC Act or communities considered threatened at the state level were observed during the field survey.

### 5.2.3 Nationally Threatened Flora

Nine flora species / subspecies listed as threatened under the EPBC Act were identified in the PMST report as potentially occurring or having suitable habitat potentially occurring within 50 km of the Project area (Table 6). Of these, one species in *Veronica parnkalliana* (Port Lincoln Speedwell, EPBC: EN, NP&W: E) had historical records of occurrence within 50 km of the Project area (Table 6). In addition, one EPBC listed species in *Senecio megaglossus* (Superb Groundsel, EPBC: VU, NP&W: E) also had historical records of occurrence within 50 km of the Project area, although this species was not considered as known to occur by the PMST report (Table 6). All of these nationally threatened species / subspecies were considered as unlikely to occur within the Project area given the unsuitability of the habitat present.

### 5.2.4 State Threatened Flora

Forty-one flora species / subspecies of state conservation significance under the NP&W Act but not national significance under the EPBC Act had historical records of occurrence from the NatureMaps BDBSA search within 50 km of the Project area (Table 6). All of these state threatened species / subspecies were considered as unlikely to occur within the Project area given the unsuitability of the habitat present.

Table 6. Threatened flora listed under the EPBC Act and NP&W Act identified within 50 km of the Project area via the PMST (Source 1), BDBSA (Source 2), or observed during the field survey. Likelihood of occurrence refers to presence within the Project area.

Scientific name	Common name	EPBC Act	NP&W Act	Data source	Date of last record	Known habitat preference(s)	Likelihood of occurrence
<i>Acacia gracilifolia</i>	Graceful Wattle	-	R	2	27/09/2023	Shrub of rocky hillsides and gorges growing in open woodland scrub with Peppermint Box and Red Mallee. No suitable habitat in Project area.	Unlikely
<i>Acacia pendula</i>	Weeping Myall	-	V	2	18/01/2019	Mostly grows on floodplains in fertile alluvial clay and red earth soil. Occasionally dominant in woodland and open woodland. Not considered indigenous to the local area.	Unlikely
<i>Acacia quornensis</i>	Quorn Wattle	-	R	2	23/02/2015	Grows in low woodland vegetation associated with native Pine on shallow calcareous loamy soils. No suitable habitat in Project area.	Unlikely
<i>Anogramma leptophylla</i>	Annual Fern	-	R	2	06/10/2020	An uncommon annual fern growing among grasses on damp banks and within rocky crevices. No suitable habitat in Project area.	Unlikely
<i>Asperula syrticola</i>	Southern Flinders Woodruff	-	R	2	04/10/1997	Grows in woodland of the Flinders Ranges often amongst rocks. No suitable habitat in Project area.	Unlikely
<i>Austrostipa breviglumis</i>	Cane Spear-grass	-	R	2	17/05/2019	Grows on hills and ridges of the adjacent ranges. No suitable habitat in Project area.	Unlikely
<i>Austrostipa densiflora</i>	Fox-tail Spear-grass	-	R	2	04/06/2015	Found in the adjacent ranges on rocky sites with shallow sandy and low-fertility soils. No suitable habitat in Project area.	Unlikely
<i>Austrostipa petraea</i>	Flinders Range Spear-grass	-	R	2	31/07/2009	Found in the adjacent ranges on rocky sites. No suitable habitat in Project area.	Unlikely
<i>Bothriochloa macra</i>	Red-leg Grass	-	R	2	15/04/1995	Grasslands and grassy woodlands. Can survive in disturbed sites such as along roadsides. No suitable habitat in Project area.	Unlikely
<i>Brachyscome ciliaris</i> var. <i>subintegrifolia</i>	-	-	R	2	05/12/2005	Few collections in the adjacent ranges. No suitable habitat in Project area.	Unlikely
<i>Caladenia coactilis</i>	Flinders Ranges Caladenia	-	R	2	07/09/1999	Found in the adjacent Flinders Ranges within Sugar Gum and Native Pine woodland. No suitable habitat in Project area.	Unlikely
<i>Caladenia gladiolata</i>	Bayonet Spider-orchid	EN	E	1	None	Fertile loam soils of gentle hillsides hosting grasslands with or without an overstorey. No suitable habitat in Project area.	Unlikely

Scientific name	Common name	EPBC Act	NP&W Act	Data source	Date of last record	Known habitat preference(s)	Likelihood of occurrence
<i>Caladenia saxatilis</i>	Star Spider-orchid	-	R	2	03/09/2016	Found in the adjacent Flinders Ranges on rocky ridges. No suitable habitat in Project area.	Unlikely
<i>Caladenia tensa</i>	Greencomb Spider-orchid	EN		1	None	Possible widespread distribution within South Australia but following taxonomic work now appears <i>Caladenia tensa</i> is limited to the south-east of the state.	Unlikely
<i>Caladenia woolcockiorum</i>	Woolcock's Spider-orchid	VU	E	1	None	Restricted to the Flinders Ranges where it grows in Native Pine forests and woodland. No suitable habitat in Project area.	Unlikely
<i>Caladenia xantholeuca</i>	White Rabbits	EN	E		None	Damp soils in mossy rock ledges of Native Pine forests and woodland. Possibly extinct. No suitable habitat in Project area.	Unlikely
<i>Choretrum chrysanthum</i>	Yellow Sour-bush	-	R	2	06/10/2020	Semi-parasitic shrub of drier woodlands. No suitable habitat in Project area.	Unlikely
<i>Christella dentata</i>	Soft Shield-fern	-	R	2	01/10/2002	Damp banks of watercourses and hollows in limestone cliffs. No suitable habitat in Project area.	Unlikely
<i>Citrus glauca</i>	Desert Lime	-	V	2	05/09/2025	Heavy clays and loams of sand plains and low dunes. Distinctive species not observed in Project area.	Unlikely
<i>Cladium procerum</i>	Leafy Twig-rush	-	R	2	01/12/2005	Perennial sedge of swamps and the margins of deep watercourses. No suitable habitat in Project area.	Unlikely
<i>Codonocarpus pyramidalis</i>	Slender Bell-fruit	VU	E	1	None	A shrub or small tree to 8 m tall, populations occur as scattered individuals or in small, localised stands, typically growing on the crests and slopes of low ridges, hills, and along creeks in loamy sand or sandy clay loam. Distinctive species not observed in Project area.	Unlikely
<i>Cryptandra campanulata</i>	Long-flower Cryptandra	-	R	2	22/11/1999	Grows in shallow soils over rocks in the southern Flinders Ranges and northern Mt Lofty Ranges. No suitable habitat in Project area.	Unlikely
<i>Dianella longifolia</i> var. <i>grandis</i>	Pale Flax-lily	-	R	2	26/09/1999	A rhizomatous herb of grasslands and grassy woodlands. No suitable habitat in Project area.	Unlikely
<i>Echinopogon ovatus</i>	Rough-beard Grass	-	R	2	22/11/1999	Grows in rocky areas of open forests and woodland. No suitable habitat in Project area.	Unlikely
<i>Eremophila subfloccosa</i> ssp. <i>glandulosa</i>	Green-flower Emubush	-	R	2	01/09/2004	Limited to the adjacent ranges. No suitable habitat in Project area.	Unlikely

Scientific name	Common name	EPBC Act	NP&W Act	Data source	Date of last record	Known habitat preference(s)	Likelihood of occurrence
<i>Eryngium ovinum</i>	Blue Devil	-	V	2	26/11/1996	Short-lived perennial of open woodland growing on damp clay and sandy soils. No suitable habitat in Project area.	Unlikely
<i>Eucalyptus percostata</i>	Ribbed White Mallee	-	R	2	05/07/2006	Grows on the slopes and along the base of rocky hills in woodlands or mallee. No suitable habitat in Project area.	Unlikely
<i>Gratwickia monochaeta</i>	-	-	R	2	06/10/2001	Annual herb of sandy habitats. Occurrence largely confined westward on the Eyre Peninsula.	Unlikely
<i>Haeckeria cassiniiformis</i>	Dogwood Haeckeria	-	R	2	06/07/2006	Found mainly on Eyre Peninsula. More common after disturbance.	Unlikely
<i>Hovea purpurea</i>	Tall Hovea	-	R	2	19/09/2001	Taller peaks of the adjacent Flinders Ranges. No suitable habitat in Project area.	Unlikely
<i>Logania saxatilis</i>	Rock Logania	-	R	2	06/10/2020	Large shrub of steep sandstone gorges in open woodland and crevices of rocky outcrops. No suitable habitat in Project area.	Unlikely
<i>Maireana excavata</i>	Bottle Fissure-plant	-	V	2	01/10/1996	Grassland species of the adjacent ranges. No suitable habitat in Project area.	Unlikely
<i>Maireana rohrlachii</i>	Rohrlach's Bluebush	-	R	2	20/12/1997	Grows on heavy soils in woodlands and coastal areas. No suitable habitat in Project area.	Unlikely
<i>Malacocera gracilis</i>	Slender Soft-horns	-	V	2	11/09/2023	Annual or perennial herb of saline clay soils, gypseous mounds, and other areas of low-lying calcareous soils. Largely restricted to powdery gypseous mounds in halophyte shrubland. Can occur in large numbers within this habitat. No suitable habitat in Project area.	Unlikely
<i>Myoporum parvifolium</i>	Creeping Boobiolla	-	R	2	21/09/2009	Prostrate plant of clay soils often in saline situations including brackish mud flats. No suitable habitat in Project area.	Unlikely
<i>Olearia pannosa ssp. cardiophylla</i>	Velvet Daisy-bush	-	R	2	04/06/2015	Confined to the adjacent ranges. No suitable habitat in Project area.	Unlikely
<i>Olearia pannosa ssp. pannosa</i>	Silver Daisy-bush	VU	V	1	None	Grows in mallee and woodland occurring on hilly, rocky areas or sandy, flat areas. No suitable habitat in Project area.	Unlikely
<i>Ozothamnus scaber</i>	Rough Bush-everlasting	-	V	2	24/11/1999	Hills and rocky gorges of the Flinders Ranges. No suitable habitat in Project area.	Unlikely
<i>Prasophyllum pallidum</i>	Pale Leek-orchid	VU	R	1	None	Grows in better-quality fertile soils within woodlands and open grassy forests of the southern Flinders Ranges, Mount	Unlikely

Scientific name	Common name	EPBC Act	NP&W Act	Data source	Date of last record	Known habitat preference(s)	Likelihood of occurrence
						Lofty Ranges, and southern Fleurieu Peninsula. No suitable habitat in Project area.	
<i>Prasophyllum validum</i>	Sturdy Leek-orchid	VU	V	1	None	Grows on gravelly loam soils of Sugar Gum woodland in the Flinders Ranges. No suitable habitat in Project area.	Unlikely
<i>Ptilotus angustifolius</i>	Narrow-leaf Yellow-tails	-	E	2	15/10/1996	Coastal cliffs and rocky slopes and hills. No suitable habitat in Project area.	Unlikely
<i>Pultenaea graveolens</i>	Scented Bush-pea	-	R	2	17/05/2019	Resinous and strongly odorous shrub of dry sclerophyll woodlands and forest. No suitable habitat in Project area.	Unlikely
<i>Rumex dumosus</i>	Wiry Dock	-	R	2	14/10/1996	Upright herb of grasslands and grassy woodlands. No suitable habitat in Project area.	Unlikely
<i>Sarcozona bicarinata</i>	Ridged Noon-flower	-	V	2	05/11/2008	Scattered collections from the Eyre Peninsula and Yorke Peninsula. Rarely seen.	Unlikely
<i>Scutellaria humilis</i>	Dwarf Skullcap	-	R	2	24/11/1999	Perennial herb of moist sheltered areas along creeks and ravines. No suitable habitat in Project area.	Unlikely
<i>Senecio megaglossus</i>	Superb Groundsel	VU	E	2	27/09/2024	Long-lived shrub. Occurs in areas of the Flinders Ranges, Mid-North, and the Marne River. Grows on variable loam to clay soils within rocky gorges and on valley slopes in tall open shrubland, woodland, and open-woodland. No suitable habitat in Project area.	Unlikely
<i>Thelymitra grandiflora</i>	Great Sun-orchid	-	R	2	06/10/2020	Grows within forest clearings, woodland, and scrub on well drained gravelly clay soils. No suitable habitat in Project area.	Unlikely
<i>Thysanotus tenellus</i>	Grassy Fringe-lily	-	R	2	31/12/1995	Grows in woodland habitat. No suitable habitat in Project area.	Unlikely
<i>Veronica decorosa</i>	Showy Speedwell	-	R	2	24/11/1999	Grows on rocky gullies and ridges of the Flinders Ranges. No suitable habitat in Project area.	Unlikely
<i>Veronica parnkalliana</i>	Port Lincoln Speedwell	EN	E	1, 2	15/10/2008	Short lived fire-responsive herb. Restricted to Mount Remarkable National Park and Telowie Gorge Conservation Park. No suitable habitat in Project area.	Unlikely

NP&W Act: E = Endangered, V = Vulnerable, R = Rare.

EPBC Act: Ex = Extinct, CR = Critically Endangered, EN = Endangered, VU = Vulnerable.

### 5.2.5 Nationally Threatened Fauna

Twenty-eight fauna species / subspecies listed as threatened under the EPBC Act were identified by the PMST report as occurring or having suitable habitat occurring within 5 km of the Project area (Table 7). Thirteen of these has had records of occurrence within 5 km of the Project area, as returned via the NatureMaps BDBSA search (Table 7). However, all of these nationally threatened species / subspecies were considered as unlikely to occur within the Project area given the unsuitability of the habitat present.

In addition, five species / subspecies not considered as known to occur or known to have habitat within the search area by the PMST report nevertheless had records of occurrence within 5 km of the Project area as returned via the NatureMaps BDBSA search (Table 7). Again, these species / subspecies were also considered as unlikely to occur within the Project area given the unsuitability of the habitat present.

### 5.2.6 State Threatened Fauna

Twenty-six fauna species / subspecies of state conservation significance under the NP&W Act but not national significance under the EPBC Act had historical records of occurrence from the NatureMaps BDBSA search within 50 km of the Project area (Table 7). All of these state threatened species / subspecies were considered as unlikely to occur within the Project area given the unsuitability of the habitat present.

### 5.2.7 Migratory Fauna

The migratory birds identified by the PMST report, in addition to species returned by the BDBSA search alone, are all considered as unlikely to utilise the Project area other than as a brief flyover due to the absence of wetland and saltmarsh habitats which support these bird species (Table 7). Vegetation clearance and works within the Project area are highly unlikely to disrupt the flight paths of these birds. All other migratory fauna returned by the PMST report represented marine only species of reptile, mammal, and shark which are all unlikely to interact with the Project area.

### 5.2.8 Marine Fauna

Marine fauna were not considered as part of the desktop assessment with the Project area being entirely terrestrial in nature.

Table 7. Threatened fauna listed under the EPBC Act and NP&W Act and EPBC listed migratory fauna identified within 50 km of the Project area via the PMST (Source 1), BDBSA (Source 2), or observed during the field survey. Likelihood of occurrence refers to presence within the Project area.

Scientific name	Common name	EPBC Act	NP&W Act	Data source	Date of last record	Known habitat preference(s)	Likelihood of occurrence
<b>AMPHIBIA</b>							
<i>Pseudophryne bibronii</i>	Brown Toadlet	-	R	2	11/08/2009	Occurs in damp areas of forest, heath, and grassland with cover provided by logs and stones. Often associated with the edges of small ephemeral creeks and depressions. No suitable habitat in Project area.	Unlikely
<b>AVES</b>							
<i>Acanthiza iredalei iredalei</i>	Slender-billed Thornbill (western)	-	R	2	05/06/2019	Arid and semi-arid chenopod shrublands dominated by samphire, sometimes near mangroves, salt lakes or salt flats. Lack of suitable habitat in Project area.	Unlikely
<i>Actitis hypoleucos</i>	Common Sandpiper	Mi	R	1	None	Migratory shorebird, non-breeding grounds in Australia. Found in coastal or inland wetlands, both saline and fresh, and mainly on muddy edges or rocky shores. Mostly found in northern and western Australia. May possibly flyover the Project area during migration but is unlikely to directly interact with the Project area given its unsuitability as a staging site (i.e., not a wetland environment).	Unlikely
<i>Amytornis merrotsyi merrotsyi</i>	Flinders Ranges Short-tailed Grasswren	VU	V	1, 2	30/10/2024	Distributed across the Flinders Ranges in approximately ten scattered and disjunct sites between Mt Neil in the north and Nelshaby in the south. Inhabit rocky (quartzitic) hillsides and hilltops, steep-sided gullies, stony rises, and ridge-crests in spinifex ( <i>Triodia</i> ) tussock grassland, usually with scattered low shrubs and occasionally an open overstorey of Cypress pine ( <i>Callitris</i> spp.) or mallee ( <i>Eucalyptus</i> spp.). No suitable habitat in Project area.	Unlikely
<i>Amytornis textilis myall</i>	Western Grasswren (Gawler Ranges)	VU	V	1, 2	01/12/2022	Western Grasswren are dependent on chenopod shrublands and other arid shrublands, particularly those which have larger, denser shrubs as well as vegetative debris to provide shelter down to ground level. Predominant habitat for the Western Grasswren is identified as <i>Maireana pyramidata</i> low shrubland, <i>Acacia papyrocarpa</i> woodland, and <i>Lycium australe</i> low shrubland. Lack of suitable habitat in Project area.	Unlikely

Scientific name	Common name	EPBC Act	NP&W Act	Data source	Date of last record	Known habitat preference(s)	Likelihood of occurrence
<i>Aphelocephala leucopsis leucopsis</i>	Southern Whiteface	VU	-	1, 2	08/12/2024	Distributed across the majority of mainland Australia south of the tropics. Inhabits a wide range of open woodlands and shrublands with an understorey of grass and / or shrubs. Favours habitat with an herbaceous understorey litter cover for foraging and requires hollows / crevices in trees for roosting / nesting. Lack of suitable habitat in Project area.	Possible
<i>Ardeotis australis</i>	Australian Bustard	-	V	2	27/01/2019	Dry plains, grasslands, and open woodlands. Favours tussock and hummock grasslands. The species is very transient in nature and likely to occur in the area when conditions in northern parts of Australia are poorer and good conditions occur locally. Construction is highly unlikely to have any impact on the conservation of this species, which likely occurs sporadically if at all within or near the Project area.	Unlikely
<i>Arenaria interpres</i>	Ruddy Turnstone	VU, Mi	R	2	25/04/1998	Migratory species, non-breeding grounds in Australia. Widespread within coastal regions of Australia. Inhabits exposed rocks or reefs, often with shallow pools, beaches and mudflats with large deposits of rotting seaweed. May possibly flyover the Project area during migration but is unlikely to directly interact with the Project area given its unsuitability as a staging site (i.e., not a wetland environment).	Unlikely
<i>Calidris acuminata</i>	Sharp-tailed Sandpiper	VU, Mi	-	1, 2	11/02/2024	Migratory species, non-breeding grounds in Australia. Inhabits intertidal mudflats, freshwater swamps, saltwater lakes, sewage farms, flooded fields, mangroves, rocky shores, and beaches. Preference for the grassy edges of shallow inland freshwater wetlands. May possibly flyover the Project area during migration but is unlikely to directly interact with the Project area given its unsuitability as a staging site (i.e., not a wetland environment).	Unlikely
<i>Calidris canutus</i>	Red Knot	VU, Mi	-	1	None	Migratory species, non-breeding grounds in Australia. Inhabits intertidal mudflats, sandflats, and sandy beaches of sheltered coasts. Occasionally use saline wetlands near the coast. May possibly flyover the Project area during migration but is unlikely to directly interact with the Project area given its unsuitability as a staging site (i.e., not a wetland environment).	Unlikely
<i>Calidris ferruginea</i>	Curlew Sandpiper	CR, Mi	E	1, 2	03/11/2024	Migratory species, non-breeding grounds in Australia. Habitat ranges from fresh to hypersaline but prefers coastal or inland mudflats. May possibly flyover the Project area during migration but is unlikely to directly interact with the Project area given its unsuitability as a staging site (i.e., not a wetland environment).	Unlikely

Scientific name	Common name	EPBC Act	NP&W Act	Data source	Date of last record	Known habitat preference(s)	Likelihood of occurrence
<i>Calidris melanotos</i>	Pectoral Sandpiper	Mi	R	1	None	Migratory species, non-breeding grounds in Australia. Inhabits coastal lagoons, estuaries, bays, swamps, lakes, inundated grasslands, saltmarshes, river pools, creeks, floodplains, and artificial wetlands. May possibly flyover the Project area during migration but is unlikely to directly interact with the Project area given its unsuitability as a staging site (i.e., not a wetland environment).	Unlikely
<i>Calidris ruficollis</i>	Red-necked Stint	Mi	-	1, 2	03/11/2024	Migratory species, non-breeding grounds in Australia. Inhabits coastal areas including sheltered inlets, bays, lagoons and estuaries with intertidal mudflats on which the species forages. May possibly flyover the Project area during migration but is unlikely to directly interact with the Project area given its unsuitability as a staging site (i.e., not a wetland environment).	Unlikely
<i>Calidris tenuirostris</i>	Great Knot	VU, Mi	E	2	03/11/2024	Migratory, non-breeding grounds in Australia. Found along the coast Australia but much less common in the south. Forages on intertidal mudflats and nests in nearby sheltered coastal habitats (e.g., bays and lagoons). May possibly flyover the Project area during migration but is unlikely to directly interact with the Project area given its unsuitability as a staging site (i.e., not a wetland environment).	Unlikely
<i>Charadrius leschenaultii leschenaultii</i>	Greater Sand Plover, Large Sand Plover	VU, Mi	R	2	11/02/2024	Migratory, non-breeding grounds in Australia. Occurs in coastal areas across all states, and in South Australia is mostly seen in The Coorong, the Gulf Saint Vincent, and the Spencer Gulf, and also on the Eyre Peninsula, west to about Streaky Bay. Habitat is mostly sheltered beaches with large intertidal mudflats and / or sandbanks or sandy estuarine lagoons. May possibly flyover the Project area during migration but is unlikely to directly interact with the Project area given its unsuitability as a staging site (i.e., not a wetland environment).	Unlikely
<i>Cladorhynchus leucocephalus</i>	Banded Stilt	-	V	2	25/04/1998	Saline and hyper saline waters of inland and coast or open freshwater wetlands. No suitable habitat in Project area.	Unlikely
<i>Corcorax melanorhamphos</i>	White-winged Cough	-	R	2	26/05/2020	Open forest and woodland. Preference for relatively wetter areas with abundant leaf-litter for feeding and available mud for nest building. No suitable habitat in Project area.	Unlikely
<i>Egretta garzetta nigripes</i>	Little Egret	-	R	2	11/02/2024	Wetlands, river edges, wet paddocks, and occasionally saline estuaries. No suitable habitat in Project area.	Unlikely

Scientific name	Common name	EPBC Act	NP&W Act	Data source	Date of last record	Known habitat preference(s)	Likelihood of occurrence
<i>Falco hypoleucos</i>	Grey Falcon	VU	R	1	None	The species occurs in arid and semi-arid Australia, including the Murray-Darling Basin, Eyre Basin, central Australia, and Western Australia. The species is mainly found where annual rainfall is less than 500 mm, except when wet years are followed by drought, when the species might become marginally more widespread. Occurs at low densities, often in areas of <i>Acacia</i> shrubland interspersed by tree-lined watercourses, tussock grassland, and open woodlands. Nests in tall trees along watercourses, particularly River Red Gum. Predominantly predated on other birds. No suitable habitat in Project area.	Unlikely
<i>Falco subniger</i>	Black Falcon	-	R	2	19/05/2024	Inhabits tree-lined watercourses and isolated woodlands mostly arid to semi-arid regions of inland areas. No suitable habitat in Project area.	Possible
<i>Falcunculus frontatus frontatus</i>	Eastern Shrike-tit	-	R	2	08/07/1999	Mostly occurs in <i>Eucalyptus</i> woodlands and forests. Prefers <i>Eucalyptus</i> species with decorticated bark, used as a preferred foraging substrate, but otherwise occupies a range of woodland and forest communities, including Stringybark. No suitable habitat in Project area.	Unlikely
<i>Haematopus fuliginosus fuliginosus</i>	Sooty Oystercatcher	-	R	2	31/10/1999	Shorebird which rarely travels far from the coast. No suitable habitat in Project area.	Unlikely
<i>Haematopus longirostris</i>	Pied Oystercatcher	-	R	2	08/12/2024	Shorebird which rarely travels far from the coast. No suitable habitat in Project area.	Unlikely
<i>Hieraaetus morphnoides</i>	Little Eagle	-	V	2	13/12/2023	Widespread in mainland Australia. Occurs in <i>Eucalyptus</i> woodland and forest. No suitable habitat in Project area.	Possible
<i>Hylacola pyrrhopygia pedleri</i>	Chestnut-rumped Heathwren (southern Flinders Ranges)	-	V	2	24/08/2025	Forests and woodlands to scrublands. No suitable habitat in Project area.	Unlikely
<i>Limosa limosa</i>	Black-tailed Godwit	EN, Mi	R	1	None	Migratory species, non-breeding grounds in Australia. Widespread within coastal regions across Australia, with the largest populations found along Australia's tropical northern coastline. Commonly found in sheltered bays, estuaries and lagoons with large intertidal mudflats or sandflats, or spits and banks of mud, sand or shell-grit. Mostly forages within intertidal areas. May possibly flyover the Project area during migration but is unlikely to directly interact with the Project area given its unsuitability as a staging site (i.e., not a wetland environment).	Unlikely
<i>Microeca fascinans</i>	Jacky Winter	-	R	2	25/05/2020	Open woodland with an open shrub layer and a lot of bare ground. No suitable habitat in Project area.	Unlikely

Scientific name	Common name	EPBC Act	NP&W Act	Data source	Date of last record	Known habitat preference(s)	Likelihood of occurrence
<i>Neophema chrysostoma</i>	Blue-winged Parrot	VU	V	1, 2	13/04/2006	Partial migrant, with some birds breeding in Tasmania. It inhabits woodlands, coastal heaths, and grasslands. Favours grasslands and grassy woodlands, often near wetlands. It also occurs in altered environments such as airfields, golf-courses, and paddocks. Will forage on saltmarsh. The species is transient and may move throughout the greater landscape during the non-breeding season. The habitat in the Project area is not suitable for breeding, but the species may move through the greater area. Construction is highly unlikely to have any impact on the conservation of this species, which likely occurs sporadically if at all within or near the Project area.	Possible
<i>Neophema elegans elegans</i>	Elegant Parrot	-	R	2	16/06/2024	Nomadic subspecies occurring across a range of habitats including coastal dunes, wooded and shrubby grasslands, mallee, and open forest and woodlands. Likely of sporadic occurrence if at all within Project area.	Unlikely
<i>Numenius madagascariensis</i>	Eastern Curlew	CR, Mi	E	1, 2	03/11/2024	Migratory species, non-breeding grounds in Australia. Inhabits intertidal mudflats and sandflats, often with beds of seagrass, sheltered estuaries, mangrove swamps, and saltmarshes. May possibly flyover the Project area during migration but is unlikely to directly interact with the Project area given its unsuitability as a staging site (i.e., not a wetland environment).	Unlikely
<i>Numenius phaeopus variegatus</i>	Whimbrel	Mi	R	2	14/03/2021	Migratory species, non-breeding grounds in Australia. Mostly inhabits intertidal mudflats where it forages and regularly roosts in Mangroves. May possibly flyover the Project area during migration but is unlikely to directly interact with the Project area given its unsuitability as a staging site (i.e., not a wetland environment).	Unlikely
<i>Pachycephala inornata</i>	Gilbert's Whistler	-	R	2	16/07/2023	Sparsely distributed over arid and semi-arid areas of southern Australia. It can inhabit a wide range of habitats but prefers a dense shrub layer. No suitable habitat in Project area.	Unlikely
<i>Pandion haliaetus</i>	Osprey	Mi	E	1	None	Mostly coastal birds of prey which requires large open areas of fresh, brackish, or saline water for foraging. Moderately common in Australia but with small numbers in South Australia. Breeding range across the coast of northern Australia with an isolated breeding population on the coast of South Australia. No suitable habitat in Project area.	Unlikely

Scientific name	Common name	EPBC Act	NP&W Act	Data source	Date of last record	Known habitat preference(s)	Likelihood of occurrence
<i>Pedionomus torquatus</i>	Plains-wanderer	CR	E	2	28/10/1995	Typically inhabit sparse, treeless grasslands of approximately 50 % bare ground with most vegetation less than 5 cm in height and some widely spaced plants up to 30 cm high. Lack of suitable habitat in Project area.	Unlikely
<i>Petroica boodang boodang</i>	Scarlet Robin	-	R	2	16/02/2025	Areas of open woodland and paddocks with scattered trees. No suitable habitat in Project area.	Unlikely
<i>Phaps histrionica</i>	Flock Bronzewing	-	R	2	07/09/2013	Arid to semi-arid plains. Sporadic visitor to more southern areas of South Australia.	Unlikely
<i>Pomatostomus temporalis</i>	Grey-crowned Babbler	-	R	2	19/10/2014	Neither sub-species occur close to the Project area. Single record based on call. Possible misidentification.	Unlikely
<i>Spatula rhynchotis</i>	Australasian Shoveler	-	R	2	29/07/2005	Wetland habitats. Prefers large undisturbed heavily vegetated freshwater swamps. No suitable habitat in Project area.	Unlikely
<i>Stagonopleura guttata</i>	Diamond Firetail	VU	V	1, 2	14/07/2024	Open grassy woodland, heath, and farmland or grassland with scattered trees. Preference for areas with tall grass cover. Roost within dense shrubs and feed at ground level on seeds and insects. No suitable habitat in Project area.	Unlikely
<i>Sternula nereis nereis</i>	Australian Fairy Tern	VU	E	1, 2	14/03/2021	Occurs along the coasts of Victoria, Tasmania, South Australia, and Western Australia. Fairy Tern nest on sheltered sandy beaches, spits, and banks above the high tide line and below vegetation. No suitable habitat in Project area.	Unlikely
<i>Stictonetta naevosa</i>	Freckled Duck	-	V	2	20/09/2001	Permanent freshwater swamps and creeks with heavy growth of Bullrushes, Lignum, or Tea-tree.	Unlikely
<i>Tringa nebularia</i>	Common Greenshank, Greenshank	EN, Mi	-	1, 2	31/10/1999	Migratory species, non-breeding grounds in Australia. Widespread in coastal regions of Australia where it forages within wetlands, mudflats, and shallows around the edges of waterbodies. Nests are constructed in association with waterbodies both coastal (e.g., estuaries and mudflats) and inland (e.g., swamps and flooded crops). May possibly flyover the Project area during migration but is unlikely to directly interact with the Project area given its unsuitability as a staging site (i.e., not a wetland environment).	Unlikely
<i>Tringa stagnatilis</i>	Marsh Sandpiper	Mi	-	1	None	Migratory species, non-breeding grounds in Australia. Coastal and inland wetlands throughout Australia. Occurs in permanent and ephemeral wetlands of varying salinity along with sewage farms and saltworks. No suitable habitat in Project area.	Unlikely

Scientific name	Common name	EPBC Act	NP&W Act	Data source	Date of last record	Known habitat preference(s)	Likelihood of occurrence
<i>Turnix varius varius</i>	Painted Buttonquail	-	R	2	14/07/2024	Occurs from south-west to eastern mainland Australia. Prefers forests and woodlands with an understorey and prominent levels of leaf litter. No suitable habitat in Project area.	Unlikely
<b>MAMMALIA</b>							
<i>Eubalaena australis</i>	Southern Right Whale	EN, Mi	V	1	None	Marine only species. Suitable habitat does not occur within the Project area.	Unlikely
<i>Petrogale xanthopus xanthopus</i>	Yellow-footed Rock-wallaby	VU	V	1, 2	09/09/2024	Found throughout the Gawler and Flinders Ranges and Olary Hills in South Australia. The species inhabits rocky outcrops, cliffs, and ridges in semi-arid areas, with the surrounding topography generally low with isolated rocky outcrops rising steeply from the surrounding landscape, and Mulga scrub the dominant vegetation. The rocky outcrops often contain permanent freshwater. No suitable habitat in Project area.	Unlikely
<i>Pteropus poliocephalus</i>	Grey-headed Flying Fox	VU	V	2	23/12/2024	Habitats that contain flowering and fruiting trees include closed and open forests, woodlands, and vegetation within urban areas. Nearby records associated with urban areas of Port Augusta. No suitable habitat in Project area.	Unlikely
<i>Trichosurus vulpecula</i>	Common Brushtail Possum	-	R	2	30/07/2024	An arboreal nocturnal marsupial of urban areas, forests, woodlands, and heathland. No suitable habitat in Project area.	Unlikely
<b>REPTILIA</b>							
<i>Aprasia pseudopulchella</i>	Flinders Ranges Worm-lizard	VU	-	1, 2	21/03/2017	Recorded in areas of stony rises and fallen timber where this species finds refuge. Usually associated with grassy areas. No suitable habitat in Project area.	Unlikely
<i>Dermochelys coriacea</i>	Leatherback Turtle	EN, Mi	V	1	None	Marine only species. Suitable habitat does not occur within the Project area.	Unlikely
<i>Morelia spilota</i>	Carpet Python	-	R	2	22/01/2019	Occurs from the Flinders Ranges eastward in South Australia. They are semi-arboreal, living in tree hollows and rock crevices and typically inhabit rocky outcrops, dry woodlands, riverine forests, and flood plains. No suitable habitat in Project area.	Unlikely
<i>Notechis scutatus ater</i>	Krefft's Tiger Snake (Flinders Ranges)	VU	V	1, 2	12/11/2022	Restricted to rocky watercourses of several stream systems in the southern Flinders Ranges. Suitable habitat does not occur within the Project area.	Unlikely

Scientific name	Common name	EPBC Act	NP&W Act	Data source	Date of last record	Known habitat preference(s)	Likelihood of occurrence
<i>Varanus varius</i>	Lace Monitor	-	R	2	31/12/2013	Large lizard of the Murray Darling Basin with isolated populations in the southern Flinders Ranges and the south-east of South Australia. Occurs in woodlands with large eucalypts providing hollows.	Unlikely
<b>SHARK</b>							
<i>Carcharodon carcharias</i>	White Shark	VU, Mi	-	1	None	Marine only species. Suitable habitat does not occur within the Project area.	Unlikely

NP&W Act: E = Endangered, V = Vulnerable, R = Rare.

EPBC Act: Ex = Extinct, CR = Critically Endangered, EN = Endangered, VU = Vulnerable, CD = Conservation Dependent, Mi = Migratory.

### 5.3 Cumulative Impact

*When exercising a power or making a decision under Division 5 of the Native Vegetation Regulations 2017, the NVC must consider the potential cumulative impact, both direct and indirect, that is reasonably likely to result from a proposed clearance activity.*

There are no cumulative impacts associated with any expansion and given the existing site, the surrounding vegetation benefits from the additional run off provided by hardstand areas in receiving higher moisture and therefore higher growth and seed production.

### 5.4 Address the Mitigation Hierarchy

*When exercising a power or making a decision under Division 5 of the Native Vegetation Regulations 2017, the NVC must have regard to the mitigation hierarchy. The NVC will also consider, with the aim to minimize, impacts on biological diversity, soil, water and other natural resources, threatened species or ecological communities under the EPBC Act or listed species under the NP&W Act.*

#### **a) Avoidance – outline measures taken to avoid clearance of native vegetation**

The development requires a largely set area for the footprint and no avoidance is possible in terms of this type of development. The footprint has been refined to impact the areas of lowest vegetation condition and surrounded by areas of existing disturbance limiting levels of fragmentation.

#### **b) Minimization – if clearance cannot be avoided, outline measures taken to minimize the extent, duration and intensity of impacts of the clearance on biodiversity to the fullest possible extent (whether the impact is direct, indirect or cumulative).**

Previously disturbed and cleared areas have been used despite the low condition of the remnant vegetation present generally with *Maireana pyramidata* a known increaser under grazing stress and indicative of poor condition.

#### **c) Rehabilitation or restoration – outline measures taken to rehabilitate ecosystems that have been degraded, and to restore ecosystems that have been degraded, or destroyed by the impact of clearance that cannot be avoided or further minimized, such as allowing for the re-establishment of the vegetation.**

Weed management will be undertaken as part of the project with removal of *Opuntia* (Prickly Pear) from the area a priority and a legal requirement under the *Landscape South Australia Act*.

#### **d) Offset – any adverse impact on native vegetation that cannot be avoided or further minimized should be offset by the achievement of a significant environmental benefit that outweighs that impact.**

An offset will be made as a payment into the fund.

## 5.5 Principles of Clearance (Schedule 1, *Native Vegetation Act 1991*)

The Native Vegetation Council will consider Principles 1(b), 1(c) and 1(d) when assigning a level of Risk under the Native Vegetation Regulations. The Native Vegetation Council will consider all the principles of clearance of the Act as relevant, when considering an application referred to under the *Planning, Development and Infrastructure Act 2016*.

Principle of clearance	Considerations
<b>Principle 1b - significance as a habitat for wildlife</b>	<p><u>Relevant information</u></p> <p>The Project area may possibly provide habitat for the following threatened fauna occurring in the local area.</p> <ul style="list-style-type: none"> <li>• <i>Aphelocephala leucopsis leucopsis</i> (Southern Whiteface, EPBC: VU)</li> <li>• <i>Falco subniger</i> (Black Falcon, NPW: R)</li> <li>• <i>Hieraaetus morphnoides</i> (Little Eagle, NPW: V)</li> <li>• <i>Neophema chrysostoma</i>, (Blue-winged Parrot, EPBC: VU, NPW: V)</li> </ul> <p>The vegetation is unlikely to support a high diversity of fauna given the lack of tall shrubs and trees providing habitat and disturbance associated with current use of the site.</p> <p>The small amount of vegetation clearance is unlikely to disrupt animal movement given the large areas of unimpacted similar vegetation types remaining within the local landscape.</p>
	<p><u>Assessment against the principles of clearance</u></p> <p>Seriously at Variance.</p>
	<p><u>Moderating factors that may be considered by the NVC</u></p> <p>None of the habitat present is of high value with low heterogeneity and perennial vegetation cover. The site is largely surrounded by other disturbed areas and does not provide critical habitat for threatened species.</p>
<b>Principle 1c - plants of a rare, vulnerable or endangered species</b>	<p><u>Relevant information</u></p> <ul style="list-style-type: none"> <li>• No threatened flora was observed during field survey or considered to occur within the block outside of the time the field survey was conducted.</li> </ul>
	<p><u>Assessment against the principles of clearance</u></p> <p>Not at Variance.</p>
	<p><u>Moderating factors that may be considered by the NVC</u></p> <p>N/A</p>
<b>Principle 1d - the vegetation comprises the whole or part of a plant community that is Rare, Vulnerable or endangered:</b>	<p><u>Relevant information</u></p> <ul style="list-style-type: none"> <li>• No threatened communities occurred within the areas of vegetation assessed.</li> </ul>
	<p><u>Assessment against the principles of clearance</u></p> <p>Not at Variance.</p>
	<p><u>Moderating factors that may be considered by the NVC</u></p> <p>N/A</p>

## 5.6 Risk Assessment

**Determine the level of risk associated with the application.**

<b>Total clearance</b>	No. of trees	0
	Area (ha)	0.94
	Total biodiversity Score	36.45
<b>Seriously at variance with principle 1(b), 1(c) or 1 (d)</b>		1(b)
<b>Risk assessment outcome</b>		Level 2

## 5.7 NVC Guidelines

Provide any other information that demonstrates that the clearance complies with any relevant NVC guidelines related to the activity.

N/A

# 6 Clearance Summary

## 6.1 Clearance Area(s) Summary Table

Block	Site	Species diversity score	Threatened ecological community Score	Threatened plant score	Threatened fauna score	UBS	Area (ha)	Total biodiversity score	Loss factor	Loadings	Reductions	SEB points required	SEB payment	Admin fee
A	1		1	0	0.1	38.78	0.94	36.45	1.0			40.10	\$11,143.43	\$612.89
						Total	0.94	36.45				40.10	\$11,143.43	\$612.89

## 6.2 Totals Summary Table

	Total biodiversity score	Total SEB points required	SEB payment	Admin fee	Total payment
<b>Application</b>	36.45	40.10	\$11,143.43	\$612.89	\$11,756.32

<b>Economies of Scale Factor</b>	0.290
<b>Rainfall (mm)</b>	264

# 7 Significant Environmental Benefit

A Significant Environmental Benefit (SEB) is required for approval to clear under Division 5 of the *Native Vegetation Regulations 2017*. The NVC must be satisfied that as a result of the loss of vegetation from the clearance that an SEB will result in a positive impact on the environment that is over and above the negative impact of the clearance.

## ACHIEVING AN SEB

Indicate how the SEB will be achieved by ticking the appropriate box and providing the associated information:

- Establish a new SEB Area on land owned by the proponent.
- Use SEB Credit that the proponent has established. Provide the SEB Credit Ref. No. \_\_\_\_\_
- Apply to have SEB Credit assigned from another person or body. The [application form](#) needs to be submitted with this Data Report.
- Apply to have an SEB to be delivered by a Third Party. The [application form](#) needs to be submitted with this Data Report.
- Pay into the Native Vegetation Fund.

## PAYMENT SEB

If a proponent proposes to achieve the SEB by paying into the Native Vegetation Fund, summary information must be provided on the amount required to be paid and the manner of payment:

- Payment amount of \$11,756.32 (including an administration fee of \$612.89) to be paid into the Native Vegetation Fund.

## Listed Threatened Species

[ Resource Information ]

Species ID	Scientific Name	Common Name	Class	Simple Presence	Presence Text	Threatened Category	Migratory Status
89224	<i>Thalassarche cauta</i>	Shy Albatross	Bird	Likely	Foraging, feeding or	Endangered	Migratory
845	<i>Limosa limosa</i>	Black-tailed Godwit	Bird	Known	Species or species	Endangered	Migratory
11956	<i>Dodonaea</i>	Peep Hill Hop-bush	Plant	May	Species or species	Endangered	
77037	<i>Rostratula australis</i>	Australian Painted Snipe	Bird	Likely	Species or species	Endangered	
1270	<i>Tiliqua adelaidensis</i>	Pygmy Blue-tongue	Reptile	May	Species or species	Endangered	
86380	<i>Limosa lapponica</i>	Nunivak Bar-tailed	Bird	May	Species or species	Endangered	
40	<i>Eubalaena australis</i>	Southern Right Whale	Mammal	Known	Breeding known to	Endangered	Migratory (as Balaena)
17458	<i>Veronica parrkalliana</i>	Port Lincoln Speedwell	Plant	Known	Species or species	Endangered	
8079	<i>Caladenia gladiolata</i>	Bayonet Spider-orchid,	Plant	Known	Species or species	Endangered	
20351	<i>Prasophyllum pallidum</i>	Pale Leek-orchid	Plant	Known	Species or species	Vulnerable	
64445	<i>Pachyptila turtur</i>	Fairy Prion (southern)	Bird	Likely	Species or species	Vulnerable	
10268	<i>Prasophyllum validum</i>	Sturdy Leek-orchid,	Plant	Known	Species or species	Vulnerable	
929	<i>Falco hypoleucos</i>	Grey Falcon	Bird	Known	Species or species	Vulnerable	
1666	<i>Aprasia</i>	Flinders Ranges Worm-	Reptile	Known	Species or species	Vulnerable	
66472	<i>Thalassarche</i>	Black-browed Albatross	Bird	Likely	Foraging, feeding or	Vulnerable	Migratory
55023	<i>Caladenia</i>	Woolcock's Spider-	Plant	Known	Species or species	Vulnerable	
64470	<i>Carcharodon</i>	White Shark, Great	Shark	Known	Species or species	Vulnerable	Migratory
82950	<i>Sternula nereis nereis</i>	Australian Fairy Tern	Bird	Known	Species or species	Vulnerable	
1061	<i>Macronectes halli</i>	Northern Giant Petrel	Bird	Likely	Foraging, feeding or	Vulnerable	Migratory
66646	<i>Petrogale xanthopus</i>	Yellow-footed Rock-	Mammal	Known	Species or species	Vulnerable	
59398	<i>Stagonopleura guttata</i>	Diamond Firetail	Bird	Known	Species or species	Vulnerable	
1075	<i>Phoebastria fusca</i>	Sooty Albatross	Bird	May	Species or species	Vulnerable	Migratory
934	<i>Leipoa ocellata</i>	Malleefowl	Bird	Likely	Species or species	Vulnerable	
470	<i>Grantiella picta</i>	Painted Honeyeater	Bird	Likely	Species or species	Vulnerable	
82287	<i>Notechis scutatus ater</i>	Kreff's Tiger Snake	Reptile	Known	Species or species	Vulnerable	
13374	<i>Senecio megaglossus</i>	Superb Groundsel	Plant	Likely	Species or species	Vulnerable	
1765	<i>Chelonia mydas</i>	Green Turtle	Reptile	May	Species or species	Vulnerable	Migratory
89223	<i>Diomedea exulans</i>	Wandering Albatross	Bird	Likely	Foraging, feeding or	Vulnerable	Migratory
89221	<i>Diomedea epomophora</i>	Southern Royal	Bird	May	Species or species	Vulnerable	Migratory
82651	<i>Ardenna grisea</i>	Sooty Shearwater	Bird	May	Species or species	Vulnerable	Migratory
726	<i>Neophema</i>	Blue-winged Parrot	Bird	Known	Species or species	Vulnerable	
12348	<i>Olearia pannosa</i>	Silver Daisy-bush, Silver-	Plant	Known	Species or species	Vulnerable	
863	<i>Gallinago hardwickii</i>	Latham's Snipe,	Bird	May	Species or species	Vulnerable	Migratory
855	<i>Calidris canutus</i>	Red Knot, Knot	Bird	Known	Species or species	Vulnerable	Migratory
64454	<i>Amytornis textilis myall</i>	Western Grasswren	Bird	Known	Species or species	Vulnerable	
19507	<i>Codonocarpus</i>	Slender Bell-fruit, Camel	Plant	Known	Species or species	Vulnerable	
64458	<i>Diomedea antipodensis</i>	Antipodean Albatross	Bird	Likely	Foraging, feeding or	Vulnerable	Migratory
64459	<i>Thalassarche impavida</i>	Campbell Albatross,	Bird	May	Species or species	Vulnerable	Migratory
529	<i>Aphelocephala</i>	Southern Whiteface	Bird	Known	Species or species	Vulnerable	
108	<i>Pseudomys australis</i>	Plains Rat, Palyoora,	Mammal	May	Species or species	Vulnerable	
64464	<i>Thalassarche carteri</i>	Indian Yellow-nosed	Bird	Likely	Species or species	Vulnerable	Migratory
64462	<i>Thalassarche steadi</i>	White-capped Albatross	Bird	Known	Foraging, feeding or	Vulnerable	Migratory
56344	<i>Swainsona pyrophila</i>	Yellow Swainson-pea	Plant	May	Species or species	Vulnerable	
872	<i>Arenaria interpres</i>	Ruddy Turnstone	Bird	Likely	Species or species	Vulnerable	Migratory
874	<i>Calidris acuminata</i>	Sharp-tailed Sandpiper	Bird	Known	Species or species	Vulnerable	Migratory
86269	<i>Amytornis merrotsyi</i>	Short-tailed Grasswren	Bird	Known	Species or species	Vulnerable	
7997	<i>Pterostylis xerophila</i>	Desert Greenhood	Plant	May	Species or species	Vulnerable	

## Listed Migratory Species

[ Resource Information ]

Species ID	Scientific Name	Common Name	Class	Presence		Threatened Category	Migratory Status
				Rank	Text		
832	<i>Tringa nebularia</i>	Common Greenshank,	Bird	Known	Species or species	Endangered	Migratory
833	<i>Tringa stagnatilis</i>	Marsh Sandpiper, Little	Bird	Known	Species or species		Migratory
59309	<i>Actitis hypoleucos</i>	Common Sandpiper	Bird	Known	Species or species		Migratory
1060	<i>Macronectes giganteus</i>	Southern Giant-Petrel,	Bird	May	Species or species	Endangered	Migratory
66472	<i>Thalassarche</i>	Black-browed Albatross	Bird	Likely	Foraging, feeding or	Vulnerable	Migratory
64470	<i>Carcharodon</i>	White Shark, Great	Shark	Known	Species or species	Vulnerable	Migratory
952	<i>Pandion haliaetus</i>	Osprey	Bird	Known	Species or species		Migratory
1061	<i>Macronectes halli</i>	Northern Giant Petrel	Bird	Likely	Foraging, feeding or	Vulnerable	Migratory
678	<i>Apus pacificus</i>	Fork-tailed Swift	Bird	Likely	Species or species		Migratory
1075	<i>Phoebastria fusca</i>	Sooty Albatross	Bird	May	Species or species	Vulnerable	Migratory
1768	<i>Dermochelys coriacea</i>	Leatherback Turtle,	Reptile	Known	Species or species	Endangered	Migratory
844	<i>Limosa lapponica</i>	Bar-tailed Godwit	Bird	Likely	Species or species		Migratory
1763	<i>Caretta caretta</i>	Loggerhead Turtle	Reptile	Known	Foraging, feeding or	Endangered	Migratory
1765	<i>Chelonia mydas</i>	Green Turtle	Reptile	May	Species or species	Vulnerable	Migratory
89223	<i>Diomedea exulans</i>	Wandering Albatross	Bird	Likely	Foraging, feeding or	Vulnerable	Migratory
89221	<i>Diomedea epomophora</i>	Southern Royal	Bird	May	Species or species	Vulnerable	Migratory
89224	<i>Thalassarche cauta</i>	Shy Albatross	Bird	Likely	Foraging, feeding or	Endangered	Migratory
82651	<i>Ardenna grisea</i>	Sooty Shearwater	Bird	May	Species or species	Vulnerable	Migratory
860	<i>Calidris ruficollis</i>	Red-necked Stint	Bird	Known	Species or species		Migratory
863	<i>Gallinago hardwickii</i>	Latham's Snipe,	Bird	May	Species or species	Vulnerable	Migratory
855	<i>Calidris canutus</i>	Red Knot, Knot	Bird	Known	Species or species	Vulnerable	Migratory
856	<i>Calidris ferruginea</i>	Curlew Sandpiper	Bird	Known	Species or species	Critically Endangered	Migratory
82404	<i>Ardenna carneipes</i>	Flesh-footed	Bird	Likely	Foraging, feeding or		Migratory
858	<i>Calidris melanotos</i>	Pectoral Sandpiper	Bird	Known	Species or species		Migratory
845	<i>Limosa limosa</i>	Black-tailed Godwit	Bird	Known	Species or species	Endangered	Migratory
644	<i>Motacilla flava</i>	Yellow Wagtail	Bird	May	Species or species		Migratory
642	<i>Motacilla cinerea</i>	Grey Wagtail	Bird	May	Species or species		Migratory
35	<i>Balaenoptera edeni</i>	Bryde's Whale	Mammal	May	Species or species		Migratory
64458	<i>Diomedea antipodensis</i>	Antipodean Albatross	Bird	Likely	Foraging, feeding or	Vulnerable	Migratory
64459	<i>Thalassarche impavida</i>	Campbell Albatross,	Bird	May	Species or species	Vulnerable	Migratory
39	<i>Caperea marginata</i>	Pygmy Right Whale	Mammal	May	Species or species		Migratory
38	<i>Megaptera</i>	Humpback Whale	Mammal	May	Species or species		Migratory
847	<i>Numenius</i>	Eastern Curlew, Far	Bird	Known	Species or species	Critically Endangered	Migratory
83288	<i>Lamna nasus</i>	Porbeagle, Mackerel	Shark	Likely	Species or species		Migratory
64464	<i>Thalassarche carteri</i>	Indian Yellow-nosed	Bird	Likely	Species or species	Vulnerable	Migratory
64462	<i>Thalassarche steadi</i>	White-capped Albatross	Bird	Known	Foraging, feeding or	Vulnerable	Migratory
64469	<i>Carcharias taurus</i>	Grey Nurse Shark	Shark	May	Species or species		Migratory
872	<i>Arenaria interpres</i>	Ruddy Turnstone	Bird	Likely	Species or species	Vulnerable	Migratory
40	<i>Eubalaena australis</i>	Southern Right Whale	Mammal	Known	Breeding known to	Endangered	Migratory (as Balaena
43	<i>Lagenorhynchus</i>	Dusky Dolphin	Mammal	May	Species or species		Migratory
875	<i>Calidris alba</i>	Sanderling	Bird	Likely	Species or species		Migratory
874	<i>Calidris acuminata</i>	Sharp-tailed Sandpiper	Bird	Known	Species or species	Vulnerable	Migratory
882	<i>Charadrius veredus</i>	Oriental Plover, Oriental	Bird	May	Species or species		Migratory

Appendix 3. BDBSA Fauna Records within 50 km

Class	Species Name	Common Name	EPBC Act	NPW Act	Most Recent Obs.
ACTINOPTERI	<i>Aldrichetta forsteri</i>	Yelloweye Mullet			21/02/2023
	<i>Arripis georgianus</i>	Australian Herring			25/01/2023
	<i>Atherinosoma microstoma</i>	Smallmouth Hardyhead			1/10/2023
	<i>Atherinosoma sp.</i>	genus of silversides			15/12/2021
	<i>Cnidoglanis macrocephalus</i>	Estuary Cobbler			7/02/2023
	<i>Favonigobius lateralis</i>	Southern Longfin Goby			1/10/2023
	<i>Helotes octolineatus</i>	Western Striped Grunter			1/10/2023
	<i>Nesogobius sp.</i>	Sand-gobies			15/12/2021
	<i>Omobranchus anolius</i>	Oyster Blenny			21/02/2023
	<i>Pseudaphritis urvillii</i>	Congolli			1/10/2023
	<i>Rhombosolea sp.</i>	genus of righteye flounders			21/11/2021
	<i>Rhombosolea tapirina</i>	Greenback Flounder			15/12/2021
	<i>Sillaginodes punctatus</i>	King George Whiting			21/02/2023
	<i>Sillago schomburgkii</i>	Yellowfin Whiting			7/02/2023
	<i>TETRAODONTIDAE sp.</i>	pufferfish			21/11/2021
AMPHIBIA		Southern Flinders Ranges Froglet			11/08/2009
	<i>Crinia riparia</i>	Froglet			
	<i>Crinia signifera</i>	Clicking Froglet			3/10/2004
	<i>Crinia sp.</i>				11/08/2009
	<i>Limnodynastes dumerilii</i>	Eastern Banjo Frog			24/11/1999
	<i>Limnodynastes tasmaniensis</i>	Spotted Marsh Frog			22/10/2011
	<i>Neobatrachus pictus</i>	Painted Trilling Frog			6/09/2005
	<i>Neobatrachus sudellae</i>	Desert Trilling Frog			3/10/1999
	<i>Pseudophryne bibronii</i>	Brown Brood frog		R	11/08/2009
<i>Rawlinsonia calliscelis</i>	South Australian Tree Frog			14/09/2005	
AVES	<i>Acanthagenys rufogularis</i>	Spiny-cheeked Honeyeater			8/12/2024
	<i>Acanthiza apicalis</i>	Inland Thornbill			16/04/2021
	<i>Acanthiza apicalis apicalis</i>	Inland Thornbill (Nullarbor, EP, YP, MN, upper SE)			19/05/2024
	<i>Acanthiza chrysorrhoa</i>	Yellow-rumped Thornbill			8/08/2024
	<i>Acanthiza chrysorrhoa leighi</i>	Yellow-rumped Thornbill (eastern SA)			14/07/2024
	<i>Acanthiza iredalei iredalei</i>	Slender-billed Thornbill (western)		R	5/06/2019
	<i>Acanthiza nana</i>	Yellow Thornbill			23/10/2023
	<i>Acanthiza pusilla</i>	Brown Thornbill			25/05/2020
	<i>Acanthiza sp.</i>	thornbills			8/03/1997
	<i>Acanthiza uropygialis</i>	Chestnut-rumped Thornbill			19/05/2024
	<i>Acanthorhynchus tenuirostris</i>	Eastern Spinebill			27/09/2023
	<i>Acanthorhynchus tenuirostris halmaturinus</i>	Eastern Spinebill (KI, MLR, southern FR)			25/11/1999
	<i>Accipiter cirrocephalus cirrocephalus</i>	Collared Sparrowhawk			14/03/2021
	<i>Accipiter fasciatus fasciatus</i>	Brown Goshawk			25/10/2023

Class	Species Name	Common Name	EPBC Act	NPW Act	Most Recent Obs.
	<i>Aegotheles cristatus cristatus</i>	Australian Owlet-nightjar			30/07/2024
	<i>Amytornis merrotsyi merrotsyi</i>	Flinders Ranges Short-tailed Grasswren	VU	V	30/10/2024
	<i>Amytornis textilis myall</i>	Western Grasswren	VU	V	1/12/2022
	<i>Anas gracilis gracilis</i>	Grey Teal			3/11/2024
	<i>Anas superciliosa</i>	Pacific Black Duck			29/07/2005
	<i>Anas superciliosa superciliosa</i>	Pacific Black Duck			14/07/2024
	<i>Anthochaera carunculata</i>	Red Wattlebird			27/09/2023
	<i>Anthochaera carunculata woodwardi</i>	Red Wattlebird (MLR, AP, YP, EP, far west, Yellabinna)			8/12/2024
	<i>Anthus australis</i>	Australian Pipit			8/06/2023
